Whereas, the original design for the Pilgrim Nuclear Power Station (PNPS) spent fuel pool was for 880 assemblies and now holds over 2,822 densely racked and tightly packed assemblies, and;

Whereas, the PNPS spent fuel pool holds over 11 times the amount of cesium released at Chernobyl, and;

Whereas, the MA Attorney General Office 2006 report cited an accident at PNPS could result in 24,000 latent cancers, \$488 billion in damages, and contamination of hundreds of miles downwind, and;

Whereas, 885 Boraflex panels, which prevent criticality and fire, will be susceptible to unacceptable levels of deterioration by September, 2017, and;

Whereas, the PNPS spent fuel pool is vulnerable to terrorist and cyber attack, and;

Whereas, citizens of the Town of _____ find this to be an unacceptable threat to our health and safety and must be resolved in the most timely manner.

Therefore, Should the people of the Town of _____ direct the town's government to communicate with Governor Baker to employ all means available to ensure spent nuclear fuel generated by the Pilgrim Nuclear Power Station be placed in secure dry casks as soon as technically feasible and consistent with the highest standards, ready to be moved to a permanent federal facility when available in order to protect the health, welfare, and economic interests of the Town of _____ and its inhabitants and visitors?
