Dear _____

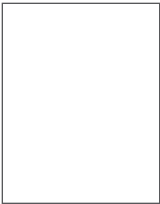

Bringing nuclear power back to Massachusetts is not a solution to our climate or energy crisis. The Commonwealth must step up to protect our communities, not increase our vulnerabilities and our electric rates. **Keep the guardrails of Chapter 503 of the Acts of 1982 in place!**

If you don't have a solution for the first generation of nuclear power plants, how can you start a second?

- *Stop the repeal of Chapter 503!*
- *No secret deal to repeal the voter approved guardrails on nuclear power in the Commonwealth.*
- *Protect our communities and deal with the problems of nuclear waste now.*

Signed, _____
