

A TERRORIST ATTACK OR AN ACCIDENT

at the Vermont Yankee Nuclear Reactor will expose vast areas of beautiful New England, and millions of innocent people to dangerous levels of radiation for decades.

For example: one small airplane headfirst into the Vermont Yankee spent fuel pool and 25,000 square miles could become uninhabitable, a 90 mile radius from reactor (yellow circle).

POPULATION OF NORTHEAST US (2000)

Connecticut	3,405,565
Maine	1,274,923
Massachusetts	6,433,422
New Hampshire	1,235,786
New York	18,976,457
Rhode Island	1,048,319
Vermont	619,107

VT Yankee is an old, embrittled reactor and should be shut down.

Safer renewable energy options are available!
