

CITIZENS AWARENESS NETWORK

Telling the truth about nuclear power. Working for a sustainable, just energy future.

Nuclear is not “Clean”!

Governor Scott wants to declare Nuclear Power as “Clean”!

For the last two years Phil Scott and his staff, along with a faithful minion of Republican legislators, have attempted to change the newly updated Renewable Energy Standard to include nuclear power and to change the name to the Clean Energy Standard.

We must not allow this to happen!

Fortunately, the “clean” initiative has failed to gain traction in the last two sessions of the VT General Assembly. However, the misguided proposal is not going away.

With fifty-eight giant casks of high-level radioactive waste sitting on the banks of the Connecticut River, with no solution for long-term storage, it is an insult and travesty for our Governor to seek a “clean” designation for nuclear energy.

We are also seeing industry initiatives to explore building Small Modular Reactors (SMRs) in New England. In Massachusetts nukes are now labeled as “clean”. New Hampshire and Connecticut are studying SMRs. Maine has said no.

Please contact Governor Scott and your legislators and tell them nuclear is not clean! And it never will be!
